Please note that there is a tolerance of 2mm-5mm required as each cup varies during mass production.

BRANDING SPECIFICATIONS - Quick Cup - 108820

The branding template shows graduated measurements that can be included in the required artwork. Remove the graduated measurements lines you do not wish to include. The graduated measurements can be made thicker, shorter or longer within the print area. Match the colour of the lines to the colour of the artwork to reduce the print cost.
